

Custom Windows/Good Windows

What we are going to do:

Okay, lets make super nice windows!!!!!!! This is a long Tut! And it is a good idea to understand Photoshop some! I am using Photoshop 7, but 6 is great also!

Get Going!

1st, Open Photoshop and make a new picture, w/the dimensions 256x256. Now in the "Layers" wind click the "layer" button twice. Then delete the background:

Now back to your image, make sure you are in Layer 2, it is highlighted, then on the left, click the f button and then pick a grey shade color, any color u want:

Now select the paint bucket and click on your canvas/image:

Okay, now go up to "file" "save as" and choose your desktop, then from the drag down menu, choose ".tga" and name it "ref":
