

Making a Light Look Light UP!

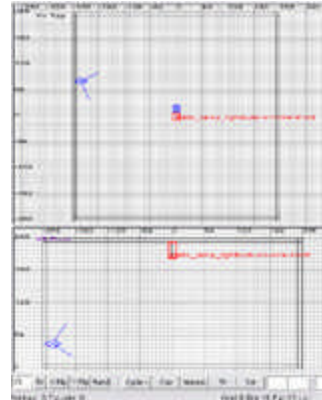

What we are going to do:

Okay, ever put a light bulb in and it s not light up? Well we will fix that! Thanx to "Svegeta for the help!

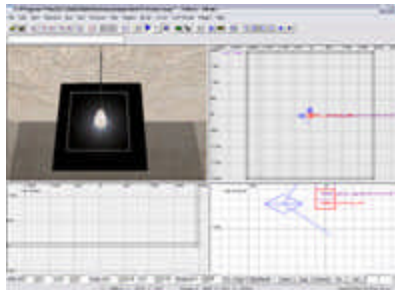

Get Going!

Okay, make a room mine is 512x512x256, put grid on 8, and hollow it out!

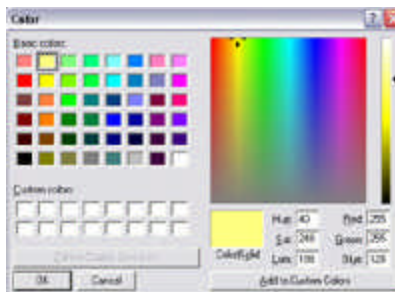

Now right click in the Top 2D view and go to "static" "lamp" "bulb-on-wire-short" and place your ceiling:

Now deselect it and right click on the top view and go to "static" "corona" "util" and place in/over your bulb:

Now w/your corona still selected you can hit "k" on your key board and choose any color y wish:

Now deselect your corona and then place a light right below your bulb:
