

Making 2 Rooms and a Hall

What we are going to do:

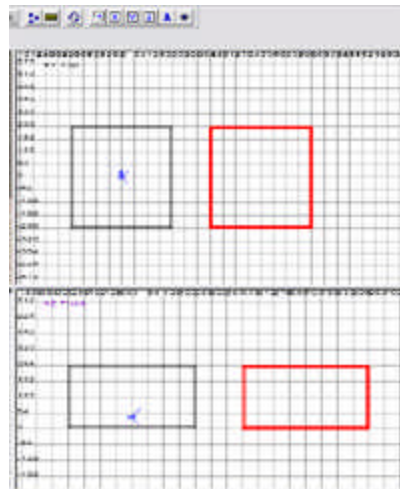

We are going to make 2 rooms and connect them w/a hall way!

Get Going!

Hopefully you have read the other tuts I wrote, if not, you might want to. Well lets go, open MOHRadi and made a room that is 512x512x265

Now what you want to do is to hallow out this room, and apply some texture, does not matter what tex you pick! Okay, w/you hallowed room still selected, tap the "space" bar and you will duplicate that room. Drag it over a lil bit so it is aligned w/the other room, but not touching it!

Now hit the "ESC" key to deselect this room. NOW YOU HAVE 2 OF THE SAME ROOOOOMS!

Now draw a little connector box so it is....well don't know how to explain, look at the pic.hehe. Look at purple arrows, make it so they are there, and make sure the bottom is not on the bottom of your 2 room
