

SCript Editor -Version 2.0-

Author : MPowell1944

Release Date : 7/31/02

DO NOT DELETE THE FILES IN THE NECESSARY FILES FOLDER THAT WAS INSTALLED WITH THE PROGRAM. THESE ARE RUN-TIME FILES THAT ARE NEEDED FOR THE PROGRAM, SO THAT IT MAY FUNCTION PROPERLY. YOU CAN EITHER LEAVE THEM IN THE INSTALLED FOLDER, OR ADD THEM TO YOUR WINDOWS/SYSTEM DIRECTORY.

Time Spent Making Program : 50+ hours (testing was main part of this)

Description :

Script editor for MOHAA. Also has many other features, making this a really good program to use. See below for details.

Added Features for 2.0 :

- 1. Load Screen (MOHAA Theme)**
- 2. Working Toolbar**
- 3. Script Generator**
- 4. Tutorial Generator**
- 5. Screenshot Archive**
- 6. Selected Programs can be Opened**
- 7. Status Bar with working Data Transfer Progress Bar**
- 8. Ability to now open/save any file versus specific ones only**
- 9. Special Right-Click menu. (has same features as edit menu - just double right click in text area to activate it)**
- 10. Edited ABOUT screen with more info on how to contact me**

Plans for 3.0:

- 1. More Scripts/Tutorials/Screenshots**
- 2. Working Undo Command**
- 3. Wordwrap**
- 4. Insert Keyword command under Right-Click menu**
- 5. Spell Checker**
- 6. Program icon in Tray (lower-right on start menu)**
- 7. Email Sender (maybe. not sure if i want to add this yet)**
- 8. Run MOHAA from menu (still working on this one!)**
- 9. Picture Viewer**
- 10. Maybe some music/sound FX. :)**

Side Notes :

- 1. DO NOT try to open any odd type of files (including pictures) with this editor. If you do, then the program will stop opening files, until you exit and reboot it.**
- 2. While i am working on version 3.0, i am allowing submissions of screenshots/custom scripts/tutorials that you think would be cool added to the program. Just send me an email with your name or nickname, and tell me what you want to send me. If i agree to take your submission, then congratulations!**
- 3. Sometimes if you exit the program via the X in the top bar, it might not prompt you to save your file. If this happens, then press Alt Ctrl Delete and End Task on the program. For some reason it dosent exit the program if it dosent prompt you to save your file. You shouldnt have much of a problem, but i decided to let you know just in case.**
